

REAL and ETHOS: Lab Launch Reception

REAL and **ETHOS** hereby invites you to the launch reception of the two new labs at the IT University of Copenhagen.

REAL is the new Robotics, Evolution and Art Lab. The vision of the lab is to do research on the border between fiction and fact, to create new, feasible scenarios for the society of tomorrow. The lab has an interdisciplinary experimental practice and the research agenda is driven by opportunities arising both within the science and art & design communities. real.itu.dk

The **ETHOS** lab combines digital, anthropological and design methods to approach research, teaching and organisational services. As a lab, ETHOS seeks to be an experimental space where different capacities of expertise at the ITU can meet, exchange and interact. The lab itself offers workshops, regular opening hours and exciting events to come. All interested students, researchers and staff are welcomed to participate. ethos.itu.dk

Stop by to learn more about our activities and gain insight into new exciting projects. Refreshments will be provided.

When:

Friday April 17, 2015
from 4- 7PM

Where:

IT University of Copenhagen
Rued Langgaards Vej 7
2300 Copenhagen S
Rooms 5A22 / 5A20

We look forward to seeing you!

Best regards,
REAL and ETHOS
